Contents of Volume 108

Number 1, November 1987

G. COUDURIER, A. AUROUX, J. C. VEDRINE, R. D. FARLEE, L. ABRAMS, AND R. D. SHANNON. Properties of Boron-Substituted ZSM-5 and ZSM-11 Zeolites	1
IAN D. GAY. Chemisorption of Ethylene on Supported Platinum Studied by High-Resolution Solid-State NMR	15
G. S. RANHOTRA, G. W. HADDIX, A. T. BELL, AND J. A. REIMER. Catalysis over Molybdenum Carbides and Nitrides. I. Catalyst Characterization	24
G. S. RANHOTRA, A. T. BELL, AND J. A. REIMER. Catalysis over Molybdenum Carbides and Nitrides. II. Studies of CO Hydrogenation and C ₂ H ₆ Hydrogenolysis	40
G. W. HADDIX, J. A. REIMER, AND A. T. BELL. Characterization of H ₂ Adsorbed on γ -Mo ₂ N by NMR Spectroscopy	50
JUNJI NAKAMURA, KEN-ICHI TANAKA, AND ISAMU TOYOSHIMA. Reactivity of Deposited Carbon on Co-Al ₂ O ₃ Catalyst	55
DEBORAH S. JORDAN AND ALEXIS T. BELL. The Influence of Butene on CO Hydrogenation over Ruthenium	63
I. SUSHUMNA AND E. RUCKENSTEIN. Redispersion of Pt/Alumina via Film Formation	77
M. ALBERT VANNICE, CHAKKA SUDHAKAR, AND MARK FREEMAN. Methanol and Methane Formation over Palladium Dispersed on the Lanthanide Rare Earth Oxides	97
K. NAGORNY AND S. BUBERT. Mössbauer Spectroscopic Investigations of Bimetallic FeCo, FeNi, and FeRu Model Catalysts Supported on Magnesium Hydroxide Carbonate	112
J. ARRIBAS, A. CORMA, V. FORNÉS, AND F. MELO. Influence of Framework Aluminum Gradients on the Catalytic Activity of Y Zeolites: Cracking of Gas-Oil on Y Zeolites Dealuminated by Different Procedures	135
ASHIM K. GHOSH, KATSUMI TANAKA, AND ISAMU TOYOSHIMA. Homologation, Hydrogenolysis, and Dehydrogenation of Ethane on SiO ₂ - and SiO ₂ -Al ₂ O ₃ -Supported Reduced Molybdenum Oxide Catalysts	143
DESMOND V. DASS, R. WAYNE MARTIN, AND ALLAN L. ODELL. Studies on the Conversion of Methanol and Other Small Molecules over H-ZSM-5: Yield Studies and the Use of ³ H NMR in a Reexamination of Routes to Ethylene Production	153
NOREDDINE TOREIS AND XENOPHON E. VERYKIOS. The Oxidation of Ethylene over Silver-Based Alloy Catalysts. 3. Silver-Gold Alloys	161
T. LIM AND S. W. WELLER. Vapor Pressure Measurements on Molybdena-Alumina	175
ÁKOS RÉDEY AND W. KEITH HALL. Reactions of Benzene and Alkylbenzenes with Deuterium over Molybdena-Alumina and Alumina Catalysts	185
J. M. COWLEY AND R. J. PLANO. A Microdiffraction Study of Gold-Ruthenium Catalyst Particles	199
JANA NOVÁKOVÁ, LUDMILA KUBELKOVÁ, AND ZDENEK DOLEJŠEK. Primary Reaction Steps in the Methanol-to-Olefin Transformation on Zeolites	208
S. A. ROTH, L. E. ITON, T. H. FLEISCH, B. L. MEYERS, C. L. MARSHALL, AND W. N. DELGASS. Metals Contamination of Aluminosilicate Cracking Catalysts by Ni- and VO-Tetraphenylporphyrin	214
LUIS M. APARICIO, W. KEITH HALL, SHIU-MIN FANG, MARIA A. ULLA, WILLIAM S. MILLMAN, AND J. A. DUMESIC. Infrared and Mössbauer Spectroscopy Studies of the Interaction of NO with Iron-Exchanged Zeolites	233

NOTES

AUTHOR INDEX FOR VOLUME 106	553
-----------------------------------	-----

The Subject Index for Volume 106 will appear in the December 1987 issue as part of a cumulative index for the year 1987.

INFORMATION FOR AUTHORS

The *Journal of Catalysis* publishes articles dealing with original studies in heterogeneous and homogeneous catalysis as well as studies relating catalytic properties with chemical processes at surfaces, studies of chemistry of surfaces, and engineering studies related to catalysis. All articles will be published in English.

Submission of Manuscripts. Manuscripts should be sent by registered mail to either of the Editors:

Professor W. Keith Hall
Chemistry Building
University of Pittsburgh
Pittsburgh, Pennsylvania 15260

Professor Frank S. Stone
School of Chemistry
University of Bath
Bath BA2 7AY, England

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Catalysis* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. Submit manuscript (in English) in triplicate, including the original typewritten copy, with copies of all figures and tables. All material (including tables, reference lists, etc.) should be typed double-spaced on one side of 8.5 × 11-in. white bond paper (with 1-in. margins on all sides). Each page of the manuscript should be numbered. *Page 1* should contain the article title, authors' names (without degrees), affiliations, a running title (abbreviated form of title) not exceeding 45 letters and spaces, and an address to which proof should be mailed. *Page 2* should contain a short abstract.

Authors should use descriptive headings in this order: Abstract, Introduction, Methods, Results, Discussion, Acknowledgments, and References.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Notes and Letters to the Editor may not exceed 8 double-spaced typewritten manuscript pages (including tables and figures). Accepted Notes will not receive publication priority over articles.

Letters to the Editor will be considered for priority publication under the following conditions: (a) Letters must be related to some statement made in a recently published article in this Journal; (b) in cases of conflicting views on any topic, no more than one Letter from each author will be accepted.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

The SI (Système International) system of units will be accepted without editorial change. Authors using other units are encouraged to define them in terms of SI units once in each publication, e.g., in an article where pressures are quoted in Torr to write "1 Torr = 133.3 N m⁻²." For information concerning SI units, see *Manual of Symbols and Terminology for Physicochemical Quantities and Units*, prepared by M. L. McGlashan and published by Butterworth, London, 1969.

Footnotes should be avoided if possible; but if essential, they should be designated by superscript Arabic numerals (starting with title) in the text.

Tables should be numbered with Arabic numerals in order of mention in the text. They should be typed double-spaced on separate pages. Each table should have a short descriptive caption typed (double-spaced) above the table. Table footnotes (indicated by superscript, lowercase, italic letters) should be typed at the end of the table.

Figures should be numbered with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed double-spaced together on a separate page. All illustrations should be in finished form suitable for photoreproduction. No figures should exceed 8.5 × 11 in. (21 × 27.5 cm). Drawings should be made with India ink on tracing linen, good quality tracing paper, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final reproduction should be inked in black.

Copies of drawings are not acceptable unless they are high contrast glossy prints. All but the very simplest structures and structural formulas must be designed for direct reproduction. Lettering should be large enough to be legible after a reduction of 50–60%. Illustrations in color can be accepted only if the authors defray the cost.

References to the literature should be cited in the text by italic Arabic numerals in parentheses, set on the text line, and listed numerically at the end of the paper. Abbreviations of journal titles should follow the style used in *Chemical Abstracts' Service Source Index*, 1985. Style and punctuation of references should be in accordance with the following examples:

1. McVicker, G. B., Kramer, G. M., and Ziemiak, J. J., *J. Catal.* **83**, 286 (1983).
2. Klier, K., in "Advances in Catalysis" (D. D. Eley, H. Pines, and P. B. Weisz, Eds.), Vol. 31, p. 243. Academic Press, New York, 1982.
3. Pines, H., "The Chemistry of Catalytic Hydrocarbon Conversions." Academic Press, New York, 1981.

Proofs. Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased; an order form will be included with proofs.
